

QUARTERLY NEWSLETTER NOVEMBER 2007

Hello and welcome to our most recent newsletter. With the 2008 season soon to be upon us it is now time to begin planning your next campaign with the team at Powa Products. We are always happy to prepare quotes and source or manufacture any products not included in our product range.

TOUCH RUGBY

Recently the team at Powa Products has been busy organising field flags, balls, and cones for various Touch Modules around New Zealand. We have added a Touch Ball to our range and this has become increasingly popular with its superior handling and grip. Our field flags are being used to entice sponsorship by Touch Module Co-ordinators as they can be specifically branded with businesses' logos / names etc. The flags can also be branded with numbers making each field in a Touch Module easily identified by the players.

RIPPA RUGBY

Rippa Rugby is a fun game which can be played by both adults and children and is a great way to stay fit over the summer months. Powa Products can now supply a range of coloured tags. The tags have been improved and are now made with new stronger PVC material, and the belts are suitable for everyone as one size fits all!

POWA SCRUM NEWS

There are two new design modifications to the Powa Scrum Sledge / Ruck Machine which are proving to be successful according to our most recent clients. We are always looking at ways to improve and adapt our products which will improve technique whilst training.

The Scrum Sledge has a new wheel design which helps protect the turf, when the forwards are doing the hard yards. We have also lowered the ruck bags which were unnecessarily high. This has proven to be a great addition making the mauling / ruck component of the scrum machine more user friendly as players hit with a more desirable low body position.

FIRE SERVICE PROJECT 2007

Over the years Chris has completed a number of special projects which he has helped design and manufacture for customers. The most recent example of this is for the NZ Fire Service. Preparation first started at the end of 2006. Part of the Fire-fighters role today is to educate young children throughout schools about firstly preventing fires from taking place and planning how you and your family will survive if your house is on fire. The finished product is a 4 metre square outlay of a house on canvas / foam mats with 8 different cubes. The cubes have different fire safety messages / pictures on each panel. The finished project is now being used to educate children throughout the Wellington region in a fun interactive way with great success.

BALL ORDERS FOR 2008!!

It's time to think about placing your ball orders for the 2008 rugby season. We can print your specific logo along with your major sponsor etc. Remember this can be done on any match or practice balls we supply so for large ball orders it makes sense for you to uniquely brand your rugby balls. A number of schools throughout New Zealand have already started branding their rugby balls which has significantly reduced the number of balls stolen / lost throughout the season.

SEASON GREETINGS FROM POWA PRODUCTS!

The Team at Powa Products wish everyone a very Merry Christmas and a safe and Happy New Year. So that you can relax, hassle free over the coming holiday season, **now** is the time to organise your training gear for next year.
